APOLLO
HOTEL TERME

Days to remember

The Bernardi family grew up by a spa water spring, watching it as it gushed forth, tripping and falling over the stones, sinking their hands into the soft, dark mud, breathing in its beneficial vapours.

For 40 years, the family has stayed faithful to its original intent: to give you an experience you will never forget in welcoming and attentive surroundings. Memorable moments in a unique setting: the hotel grounds are a true sanctuary, far from the hustle and bustle of everyday life.

The main driveway stretches like a promenade, leading to the nearby footpaths that climb gently towards the Euganean Hills, amid rows of cluster-pines and low vines.

Your perfect day

A warm welcome awaits you from Susetta and Stefano Bernardi, their children and staff, and the promise of a perfect day at Hotel Terme Apollo.

In the morning, between 4,00 am and 10,00 am (so you have more time for yourselves afterwards), if you have scheduled **spa treatments**, your phone will ring, gently rousing you from your sleep and inviting you downstairs where, on the ground floor, you will be covered in **mud and your pampering** will begin.

After breakfast get some fresh air and **stretch your legs** in the hotel grounds, admiring the view over the Euganean Hills and the beautiful natural setting. Now it is time to give your **muscles a workout**: 20 minutes in the whirlpool bath in the hottest pool and 10 minutes of **Kneipp therapy**, alternating hot and cold water to help your circulation.

From 10.30 am to midday follow your own personalised schedule of **stretching** exercises in the gym to protect and improve the movement of your joints.

The afternoon is dedicated exclusively to your psychological and physical wellbeing: choose from a **yoga class** on Mondays and on Thursdays from 3,00 pm to 4,00 pm, a session in the **sauna**, a **beauty treatment**, an **Ayurvedic massage**, a dip in the pool, a chance to read a book in the shade of the clusterpines in the grounds, a walk along the paths which climb gently towards the hills or a swim before the sun goes down, the air laden with the scent of flowers.

After dinner you can enjoy good music near the bar or chat with friends, relaxing in one of the many large entertainment areas.

Before you know it, it's **midnight**: your cool room awaits, a haven of peace and quiet with its soft sheets ready to embrace you.

Our love of water

Our bond with water is a universal bond that brings together every part of our body, every corner of heaven and earth.

The water from our spa spring flows deep beneath the ground along the asthenosphere at a depth of 100 - 350 km, reaching the right temperature for it to be called hyperthermal and taking on the special characteristics that make it salt-bromide-iodine spa water.

The water travels for 30 years through a maze of underground passages from the Lessini mountains until it reaches the underground aquifer that is right under our hotel, where it is collected at a depth of 250m and at a temperature of 72°C.

There is something genuine, inexplicable and protective about this water as it takes you in its embrace, relieving tensions and allowing you to see things in a new light.

SALUS PER AQUAM, SPA WATER TREATMENTS

Our precious water is also used for therapeutic purposes.

In the whirlpools in the wellbeing areas of our pools, its energy combines with its particular temperature to relax the muscles and relieve pain and tension.

Balneotherapy: soak up good health

A short swim or dip in spa water - at different temperatures (from 28°C to 38°C) - is often all you need to reduce pain.

Movements which are normally difficult or painful out of the water can be done without any great effort when you are in the water, and the hydrostatic pressure generates a continuous massage.

Due to the lack of gravity in water, a dip in the swimming pool has beneficial effects on the centres of our postural balance, so is recommended for rehabilitation, for the psychological and physical recovery of athletes after a demanding season and for treating rheumatic joint diseases.

Hydrokinesitherapy: the miracles of water

We are particularly proud of our hydrokinesitherapy treatment. It is carried out with the assistance of a physiotherapist and consists of active and passive exercises moving the muscles in spa water.

This treatment is highly recommended after surgery to the hip, knee, shoulder, knee ligaments and rotator cuff. It is also ideal after spine stabilisation surgery.

Benefits: the healing process is faster and rehabilitation easier, thanks to the muscle-relaxing action of the spa water and the benefits of exercising in water.

Entrance to the four spa pools and the Kneipp baths for the duration of your stay: € 24,00

Kneipp therapy: health from your feet upwards

This treatment involves walking barefoot on stones in the water for a couple of minutes, alternating hot and cold water.

Benefits: it stimulates the nervous system, improves blood and lymphatic flow, frees the body of toxins and strengthens the immune system.

Inhalation therapy: breathing and purifying

Salt-bromide-iodine spa water can be used for nebulizing, it becomes gaseous, we can breathe and inhale it in its liquid state.

Benefits: inhalation and aerosol therapy help purify the mucous membranes of the respiratory system (pharynx, larynx, bronchi and paranasal sinuses). They are also recommended for children.

Conditions treated are: rhinitis, pharyngitis, laryngitis, sinusitis, chronic catarrhal otitis and chronic bronchitis.

Inhalation /Aerosol: € 9,00

Micronised nasal shower

This treatment is recommended for all conditions affecting the upper respiratory tract (nose, paranasal sinuses, rhinopharynx, Eustachian tube) which present catarrhal, mucopurulent and crusted secretions.

Nasal shower: € 9,00

Inhalation therapy is available without an appointment from Mondays to Saturdays from 7.30 am to 10.00 am.

The secret of mud

A natural sculpture spreads over the body and takes shape, thanks to gentle expert hands. A journey to discover total wellbeing, the secret world of particles, the close relationship between water, algae and mud. The warm mud slowly covers your body, wrapping it in a red hot embrace, in a reassuring cocoon,

an alchemy of elements: nitrogen, calcium, iron, phosphorus, potassium, magnesium, sulphur, iodine and silica. Then thousands of drops melt the mask and prepare your body for a relaxing bath, coaxing you gently back to reality.

Costa Lake is an important natural and ecological attraction in the area, and the largest and best-known natural water basin in the Euganean Hills. Thermal spring water flows into the lake at a temperature of about 45°C, with bubbles clearly seen on the surface of the water.

MUD TREATMENTS

Today, just like 2000 years ago, the spas at Abano and Montegrotto are the perfect place to restore your health, physical and psychological wellbeing. It is a scientific fact that mud and spa water treatments help rebalance the metabolism of bone tissue.

Benefits: the high temperature of the mud stimulates perspiration and helps eliminate toxins. Fangotherapy blocks the degeneration of cartilage, it stimulates the production of endogenous opioids, and encourages remineralisation. The action of the water and mud, with this enhanced exchange of toxic substances, makes the skin more supple, younger-looking and velvety, visibly improving the condition of the derma. From a therapeutic point of view, we recommend completing treatment with a rejuvenating massage to continue ridding the body of toxins.

The fangotherapy ritual consists of:

- 20 minute fangotherapy session
- removal of mud and thermal shower
- 10 minute soak in an ozonised thermal bath with spa water
- 20 minute massage

The ritual finishes with a rest for the post-mud reaction and perspiration.

Conditions which can be cured with fangotherapy:

osteoporosis, osteoarthritis, widespread arthritis, joints with limited mobility, scapulohumeral periarthritis (not recommended in the acute stage due to the heat), rheumatism, fibrosis, tendinitis, backache, fibromyositis, dormant rheumatoid arthritis (in certain situations).

Contraindications for fangotherapy: anyone suffering from heart, kidney or liver problems, severe problems with arteries and veins, neoplasia, inflammatory diseases, hyperthyroidism, epilepsy.

Medical Assistance

Our medical team is always on hand to provide information and assistance.

Appointments can be booked at reception. This check-up is compulsory before undergoing treatment and is carried out by our specialists who prescribe treatments on the basis of the guest's conditions.

Medical examination before beginning spa treatments: € 27,00

Fangotherapy

The DOC® thermal mud used in our treatments is spread over the patient's body by the therapist following the doctor's directions as regards temperature, duration and location. A cycle of at least 10-12 applications over a two-week stay is recommended for the treatment to be effective.

Thermal fangotherapy with mud (body), shower and thermal bath with ozone € 27,00

Thermal fangotherapy with mud (hands) € 13,00

Bathrobe (rented for the duration of the treatment) € 12,00

Thermal bath with ozone

Benefits: it gives arteries and veins more elasticity and continues eliminating toxins. It also encourages hormonal and biochemical stimulations, muscle vasodilatation and has an analgesic effect. It increases oxygenation of the blood in the veins and tissue renewal.

Therapeutic thermal bath with ozone € 11,00

Rejuvenating therapeutic massage

After a fangotherapy session and when the perspiration reaction has finished, the guest normally has a rejuvenating full body massage.

Benefits: thanks to its tension relieving action on the muscles, especially in the lumbar and cervical region, it improves circulation, relaxes, releases energy blocks, tones muscle mass and gives the whole body a sensation of wellbeing.

Duration 20 mins: € 22,00 - 40 mins: € 38,00 - 55 mins: € 55,00

Did you know? Mud is called a "natural therapy" because it undergoes maturation and, when enriched with organic compounds, it takes on therapeutic properties. When mud or clay are exposed to oxygen and sunlight and then come into contact with spa water, they develop a biological biofilm made up of cyanobacteria and algae. Cyanobacteria have anti-inflammatory properties and research centres have shown that their efficacy is on a par with that of drugs, but with no side effects.

Thermal 5 Colours® treatment:

an innovative line of cosmeceuticals for international spa wellbeing. Five ranges of body products with natural extracts: they combine mud with thermal water from the Terme Euganee, algae and the typical aromas of the Euganean Hills National Park. Each of the products has its own distinctive fragrance, ingredients and properties. The mud is added to five specially created creams which enhance its specific qualities and give it five natural colours.

SPA ETIQUETTE

Our pools and spa centre are havens of tranquillity and relaxation so, to ensure your experience is as pleasurable as possible, we kindly ask you to switch off your mobile phones.

Scheduling an appointment

If you wish to receive information or make an appointment with our doctor for the spa treatments (mud applications or inhalation with thermal water) or the relaxing treatments, please contact reception by dialling 340 or 206 from your room or by sending us an e-mail to: reception@termeapollo.it.

Arrival time

To get the most out of your experience, we recommend you arrive at least 5 minutes before your treatment is scheduled to start so you can begin your session on time. Should you arrive late, we cannot guarantee you will be able to have your full session.

Cancelling an appointment

You may change or cancel your appointment free of charge up to 12 hours beforehand. Guests who fail to cancel or turn up for their scheduled treatment will be charged.

Dress code

Hotel guests may access the Wellness area in the bathrobe and flip flops provided in their room. The area of sauna and of the Turkish bath is a "clothes free" area so, once inside, we ask all guests to remove their clothes and wrap a white towel around their hips or chest. A swimming costume and cap must be worn in the pool area when swimming.

What to wear during treatments

We recommend you take advantage of the thermal baths and all the treatments provided without being hampered by clothes. Guests will be given a pair of disposal knickers (male and female). During massages and treatments, your body will be covered and only the part which is being massaged or treated at that particular moment will be exposed. We suggest you wear socks and light, comfortable garments for the Shiatsu massage and physiotherapy.

Health considerations

We kindly ask all guests to tell the staff at the wellness desk at reception or at the spa centre on the ground floor of any health problems before booking treatment.

We have special treatments for pregnant women.

HEALTH, WELLNESS AND HARMONY 2018

A stay at the Hotel Apollo is a "Super" experience

Hotel Terme Apollo has been classified as "Super" First Class by the Italian Ministry of Health, the highest possible rating for spa treatments. This rating endorses the Guarantee of the Pietro d'Abano Centre for Spa Studies which carries out scientific research on spa medicine. The spa water at the Hotel Apollo comes from the Lessini Mountains and flows more than 250 metres under ground at a temperature of 72°C. It is defined as "salt-bromide-iodine hyperthermal water with antioxidant, anti-inflammatory and antiseptic effects".

The mud, which comes from the clay collected from nearby Costa Lake at Arquà Petrarca, is constantly checked by the monitoring network of the University of Padua, which has confirmed the unique nature of the mature mud used in our treatments: the ETS05 alga actually reproduces exclusively in the Euganean thermal basin. The therapeutic properties of the mud and spa water to treat and prevent osteoarthritis,

osteoporosis, extra-articular rheumatism and diseases of the respiratory system are recognised by the Italian National Health Service which will refund part or all of the treatment cost upon presentation of a doctor's prescription.

Thanks to our AGREEMENT with the ITALIAN NATIONAL HEALTH SERVICE for Fangotherapy - Balneotherapy - Inhalation therapy, guests can undergo a cycle of anti-inflammatory treatments with thermal mud or a cycle of thermal inhalations or aerosol therapy by simply presenting a prescription from their general practitioner and paying the contribution currently established by law.

Practising doctors are allowed to experience mud therapy free of charge so they can personally experience the benefits of the treatment and recommend it to their patients. All the doctors and therapists at Hotel Apollo are selected after thorough evaluation of their education and training, reliability and experience.
